

CHAPTER 23

RECONSTRUCTION/RENEWAL GETTING TO UNDERLYING DECISIONS

Overview:

It's not what happens to a person that causes any blockage, limitation, imbalance or unwanted condition, it is the interpretation they give it. The decision made as to what the meaning of an event is determines how the mental computer will process all similar events, feelings or perceptions. It is the decisions which form the morphogenetic germ and perpetrates the vibratory quality of its field of energy/consciousness decisions. We form reference points that lay buried and unexamined creating ongoing patterns of thinking and responses. These act as filters to distort and delete the information received to ensure it focuses on what makes it right, special and supports it's identities. Reason is not possible until the filters are recognized and removed.

RECONSTRUCTION/RENEWAL

Getting to underlying decisions

And I'm going to be asking you to remember something that perhaps you'd rather not recall, one part of you may resist it as another anticipates the release waiting for you.
